

Tyler McBride

Chicago, IL | +1 (310) 863-9977 | tylermcbride@uchicago.edu | [LinkedIn](#)

SUMMARY

Dual-degree professional in Business Economics and Computer Science. Hands-on experience deploying technical solutions to real-world business problems and accelerating product development with an AI-native approach.

EDUCATION

The University of Chicago

Graduating June 2026

B.S. in Computer Science, B.A. in Business Economics | GPA 3.7

- Varsity Football: Midwest Conference All-Academic Honoree
- Study Abroad: London School of Economics (*Financial Markets: History of Bubbles and Crashes*)
- Algo Group: Architected software algorithms to gain insights into industry trends

PROFESSIONAL EXPERIENCE

Nutanix – Software Engineer Intern (MTS)

June - Sept. 2025

- **Business Impact:** Utilized AI-driven analysis to identify memory drift in 6 core components, achieving a 15%+ reduction in memory usage per component to optimize distributed system performance
- **Technical Innovation:** Built a Model Context Protocol (MCP) AI workflow for the Nutanix NDB service to automate log output summarization, significantly reducing manual engineer review time
- **Systems Optimization:** Surfaced and resolved critical memory leaks in distributed storage system using advanced memory management tracking tools
- **Product Analytics:** Summarized system improvements and presented findings to inform long-term business strategy and implementation of improved software
- **Leadership:** Directed a social committee of 13 interns, managing cross-cohort event logistics and team engagement

Site Service Software – Software Engineer Intern

Aug. 2024 - Dec. 2024

- **Operational Efficiency:** Leveraged AI-powered development to deliver 14 full-stack web pages (React & Spring Boot) ahead of schedule, accelerating the product roadmap
- **Infrastructure Overhaul:** Re-architected an Azure-hosted MS SQL Server backend, cutting average query latency by 40%
- **Technical Leadership:** Led weekly code reviews for the engineering intern team, implementing structured feedback loops to improve code quality and team organization

Banc of California – Product Management Intern

June - Aug. 2024

- **Enterprise Strategy:** Validated over 8,000 accounts for a \$40B merger with Pacific Western Bank, ensuring data integrity and compliance during a high-stakes corporate integration
- **Product Lifecycle:** Led User Acceptance Testing (UAT) campaign for a new cloud-based Salesforce platform, employing Agile methodologies to ensure alignment with business objectives
- **Stakeholder Management:** Identified and communicated user interface/user experience bugs via Jira, coordinating directly between product and engineering teams to streamline deployment
- **Automated Testing:** Developed test scripts on Online Digital Banking (D1B) platform for Fidelity National Information Service (FIS) to accelerate product testing cycle

The University of Chicago – CLC Software Developer/Assistant

Mar. 2023 - Present

- **Project Leadership & Automation:** Led a cross-functional team of three to architect and deploy a cloud-based checkout application, automating workflows to reduce manual administrative overhead
- **Performance Optimization:** Optimized MySQL database queries to cut latency by approx. 90% and translated these technical gains into business insights for non-technical stakeholders
- **Digital Modernization:** Drove departmental adoption of immersive educational curriculum by managing and deploying content for a fleet of VR hardware

SKILLS

- AI & Automation: LLM Integration, Prompt Engineering, Model Context Protocols (MCP), AI-driven Development
- Business & Strategy: Product Management, Agile/Scrum, Data Strategy, Financial Theory, Stakeholder Communication
- Cloud & Infrastructure: AWS Certified Cloud Practitioner, Microsoft Azure, Distributed Storage, Backend Infrastructure
- Software & Data: Python, Java, Rust, C/C++, React, Spring Boot, Django, SQL (PostgreSQL, MySQL, MS SQL Server)
